

Service & Support Engineer

Are you a highly driven Service & Support Engineer with a strong track record within the Automation Industry? If so, read on if you would welcome the opportunity to utilise your expertise working autonomously, whilst being part of a team of experienced professionals, thinkers and self-starters who 'See, Know, Act'. And above all, are willing to go the extra mile for customers!

Yokogawa's global network of 88 companies spans 55 countries. Founded in 1915, the US\$4 billion company conducts cutting-edge research and innovation. Yokogawa is engaged in the industrial automation and control (IA), test and measurement, and other businesses segments. The IA segment plays a vital role in a wide range of industries including oil, chemicals, natural gas, power, iron and steel, pulp and paper, pharmaceuticals, and food.

Yokogawa has a wealth of experience in every part of the oil and gas business, providing solutions that enhance safety, ensure accurate and reliable operation, and increase plant efficiency. Continuous improvement is a key principle at Yokogawa and the business goal is for sustainable growth, satisfied customers and personal development of employees.

Reporting to the Operations Team Leader, your mission as a Service & Support Engineer will be to provide first class support whilst being the technical focal point from hand over by sales to project closing. For each project your remit will include; project initiation system design; project planning; detailed design; configuration; provide technical specification to procurement and supervision of suppliers; internal testing; executing or leading the Factory Acceptance Test, transition to site, site installation, commissioning and Site Acceptance Test, resulting in a customer accepted and handed over system, with documents authorised by the customer; monitoring and controlling the quality of work; and formalising project closures.

To be considered for this Service & Support Engineer role, you'll have the following experience, qualifications, skills, knowledge and attributes;

- Experience in a similar role within the petrochemical / Automation industry
- Minimum bachelors qualification in an engineering or process related subject
- Safety Systems experience an advantage but not essential, as training will be provided
- Understanding of ISO 9001 and Health and Safety at Work Act
- Ability to work with minimal supervision, whilst an effective team player as part of a structured team
- Confident communicator with a professional manner, and the ability to absorb and impart factual information to others and work within standard operating procedures
- A positive self-starter with drive to achieve results in a friendly manner, but at the same time maintain quality and standards
- Willing to learn and expand skills knowledge
- Full Irish driving licence

Applicants with Offshore certificates are highly desired, however full training can be provided.

In return;

Salary: €30,000 - €35,000, level dependent on experience. Plus overtime / TOIL where relevant.
